AutoCAD Crack With License Key

The AutoCAD software product line includes AutoCAD, AutoCAD LT, AutoCAD Map 3D, AutoCAD Web and AutoCAD Graphic. AutoCAD is used by both professional and nonprofessional artists, architects, engineers, graphic designers, and machinists to create drawings and diagrams of 2D and 3D objects and to sketch and draft 3D models. AutoCAD features include tools for drawing and editing text, vector and raster graphics, technical and design templates, feature integration with AutoCAD Architecture and AutoCAD Mechanical, modeling, measurement, and various symbols for drafting. AutoCAD LT is a free, simplified version of the original AutoCAD, designed to run on lower-cost or older hardware or in areas with slower Internet connections. It is a 32-bit version that requires less memory. AutoCAD LT is not available for the 64-bit version of Windows 10. AutoCAD 2018 comes with several new features. AutoCAD 2018 is based on the new AutoLISP programming language, which is based on Visual Basic. AutoLISP has many advantages over the original AutoCAD programming language, including faster code execution. AutoCAD 2018 is based on the latest version of the AutoCAD Architecture format, AutoCAD Architecture R14. AutoCAD 2018 also features improved tools to solve architectural problems. AutoCAD LT 2018 is based on AutoCAD Architecture R14 and AutoLISP. AutoCAD 2018 has a high-resolution, new full-color screen. AutoCAD LT 2018 is designed to run on lower-cost or older hardware. AutoCAD 2018 has new system requirements for the operating system. AutoCAD 2018 requires a 64-bit Windows 10 operating system. AutoCAD LT 2018 requires a 32-bit Windows operating system. AutoCAD 2018 requires a 64-bit version of Windows 10. AutoCAD LT 2018 requires a 32-bit version of Windows. AutoCAD LT 2018 requires a 32-bit version of Windows 7, 8 or 10. AutoCAD 2018 and AutoCAD LT 2018 support 64-bit versions of Windows 10. AutoCAD LT 2018 supports 32-bit versions of Windows 7, 8 or 10. AutoCAD LT 2018 supports 32-bit

AutoCAD Crack

AutoCAD has a number of import and export formats, including DWG, DXF and PDF. AutoCAD has numerous import and export plugins for third-party software. AutoCAD also provides interfaces and APIs for access to digital asset management. For example, the Dynamic Content Framework in AutoCAD provides a dynamic asset management system for digitally created content. In June 2010, Autodesk announced that version 2011 of AutoCAD would have a new Web application programming interface (API) that would allow users to create their own AutoCAD add-ons by writing code in either a Visual Basic for Applications (VBA) or JavaScript language. In September 2010, Autodesk added an AutoLISP interface to the application, allowing developers to write AutoCAD add-ons directly in AutoLISP. AutoCAD users can write code in AutoLISP, Visual LISP, or VBA and download the code directly to their AutoCAD files. The coding experience is similar to that in AutoCAD, with the exception that, unlike AutoCAD, in which a user has to perform an "Edit to AutoCAD" command on each block of code, users of the AutoCAD add-in have to perform an "Edit to Object" command instead. AutoCAD 2011 also introduced a Web API, which is available for developers who wish to create their own AutoCAD add-ons. The same technology used for the Web API is also used for AutoCAD's Dynamic Content Framework. AutoCAD's new integrated Web API requires the user to

be registered for the Dynamic Content Framework in order to enable new functionality. However, users without a Dynamic Content Framework registration can still use the Web API for standalone applications. AutoCAD 2013 introduced the new version of the Web API. This version is a continuation of the work done in previous years, and provides a RESTful API for AutoCAD that uses JSON for data representation. One of the most notable features in this version is a newly introduced RESTful API for Dynamic Content Framework, enabling the creation of new, non-AutoCAD content such as 3D geometry. In May 2013, Autodesk announced that it would no longer support Visual Basic for Applications for use in AutoCAD.
