Fast HTML Checker Free Download [Latest]

Fast HTML Checker is an application designed to help you find HTML5 and CSS errors on your websites.

It uses a multithreaded algorithm to verify multiple pages at once, and it can generate comprehensive reports, as well as provide you with helpful hints. Create and manage multiple scanning jobs For starters, you need to set up a new scan. Once you have provided the start URL, you can name the job and configure various other parameters, such as the URL timeout and the maximum number of threads. The web crawler also offers a host of configuration options, and it supports several user authentication methods, such as form login and SSL certificate. Check websites for errors and create detailed reports After everything has been set up, you can launch the scanning job. The application can either verify the entire site, a page or a directory, and it is capable of checking multiple pages at once, thus speeding up the operation. When the scan has been completed, you can view the results in a new window. Extensive details are provided for each of the verified links, along with hints that help you understand how errors can be fixed. Filters are available to help you find what you are interested in, and the reports can be exported to a number of formats, including HTML, XML and plain text. Easy enough to use, and comes with helpful documentation The user interface features a fairly intuitive layout, but you may wish to consult the documentation if you don't have a lot of experience with these types of programs. Thankfully, the user manual provides you with detailed and very helpful explanations. On the whole, Fast HTML Checker is a great tool for web developers looking to pinpoint and resolve HTML5 and CSS errors. It comes with a decent set of features and has an intuitive layout that first-time users will certainly appreciate. rShrink is an Open Source application that allows you to shrink images on your web page.rShrink allows you to upload an image from your computer, or from a URL, and it will be shrunk. Uploaded images will be automatically resized and saved. Free Responsive QA Plugin for WordPress Free Responsive QA Plugin for WordPress is a free WordPress responsive QA plugin for WordPress users to set their "Subheading" or "Text-Only" in Media Modals Code features: 1. Page descriptions such as "Image description", "Video description" and so on. 2. Center "Menu" and 09e8f5149f

On the whole, Fast HTML Checker is a great tool for web developers looking to pinpoint and resolve HTML5 and CSS errors. It comes with a decent set of features and has an intuitive layout that first-time users will certainly appreciate. All the premium features for one low price Affordable responsive HTML5/CSS template Razor sharp editable PSD Hybrid Bootstrap 3.3.4 Minimalistic flat HTML5/CSS layout Testimonials: "The premium version is a must. The responsive design is great, and the clean font style is ideal for webpages. The design itself works perfectly in all browsers. Also, the template comes with a clean PSD with all of the layers well-organized. I would definitely recommend this template." Omkar Kumar Creat

What's New In Fast HTML Checker?

- Automatically verifies websites for HTML5 and CSS errors with as many as 500 URLs in just 2 minutes!
- Finds errors in ALL HTML and CSS code such as white spaces, tabs, line breaks, links and more, and highlights syntax errors for a quick and easy HTML fix.
- Check new HTML websites in record time, loads them in the browser window without network delays, and keeps track of the progress.
- Check "live" websites (automatically checks website pages after loading)
- Scans 30+ popular websites within seconds, and by default, only checks the first page of every website in a folder, so the process does not take an hour or two.
- Visit websites you own or have access to any time, any day, any time, in any browser.
- A license can be used on more than one computer – no time limit – even just one.
- Create and manage multiple scanning jobs.
- Check websites for errors and create detailed reports.
- Multithreaded algorithm to reduce downtime.
- Filters are available to help you find what you are interested in.
- Easy enough to use.
- Includes

comprehensive documentation. •Identify hundreds of HTML5 and CSS errors, such as line breaks, white spaces, tabs, links, image paths, quotation marks, and more! •Highlights syntax errors for a quick and easy HTML fix – the program gives you the code it checks. •Finds errors in all code fragments, from top to bottom of a page. •Check new HTML websites in record time, loads them in the browser window without network delays, and keeps track of the progress. •Check “live” websites (automatically checks website pages after loading) •Finds thousands of errors in a single scan! – even errors in closed code fragments. •Visit websites you own or have access to any time, any day, any time, in any browser. •Scan a single website and get an extensive list of all errors, and a link to the page that has them. •Find the error in seconds and fix it in minutes. •Create and manage multiple scanning jobs, including the ability to save the results as a text file. •Check websites for errors and create detailed reports. •Automatically generates a detailed HTML report or HTML5 report that helps you pinpoint, fix, and correct HTML5 and CSS errors. •Filter
