FIFA (from the French term Football) is a simulation video game series that is published by Electronic Arts (EA), and has been released for multiple platforms including Sony PlayStation, Microsoft Xbox, Nintendo Switch, and Microsoft Windows. It was initially released on PC. It is the #1 rated football game in the world and the best-selling football game franchise of all time, with over 200 million sales worldwide since its creation.

Gameplay The gameplay of FIFA is a mix of simulation and action, as in real football. The player has the ability to control the player with total control, and can kick, pass, tackle, dribble, shoot, hold up the ball, and dive.

Single Player The Single Player features 11 game modes to play through (although there are more than 30 in total). The standard modes include a 1 v 1 game, a tournament (e.g. FIFA Ultimate Team League, ICC Champions Trophy, etc.), online games, a Career mode, a preseason tour, and Season mode.

Career Mode The Career mode is for simulation and customization of your preferred player's gameplay. You can choose your preferred formation and management, upgrade your players, and learn your preferred tactics. You can also customize the players' stats, and purchase and hire players with a transfer budget. You can manage your captaincy and team, with the ability to engage in friendly and friendly matches.

PICs will allow real world game players to better control their impact during gameplay, creating more variables and helping players to better execute controlled and directed hits.

More Action Gameplay and gameplay systems in FIFA 22 have been simplified and improved. One-on-one situations are more active and will allow for more opportunities to score, but more importantly, one-on-one situations are a more fun and more dynamic game.

Rationale The main rationale behind these gameplay improvements, is that game balance is secondary to player enjoyment. The overall game play was felt to have become too theoretical, with a lot of minutes spent explaining the use of certain game tools rather than having games played. This game will include these changes from the 2015 FIFA, as they will have been a highly
