Privacy Michael Jordan's tomb to go under quarantine after threat JORDAN: On the basketball court, sports has long been a two-way street. But for Michael Jordan, the game is always a three-sided street. In the real world, his stardom as a basketball player remains unrivaled. In the afterlife, he'll have a tomb to call his own. Jordan, who died in February at age 65, has been chosen to be buried in a tomb in an exclusive, secluded cemetery owned by the late billionaire Jordan's family in an affluent neighborhood on the outskirts of his hometown in North Carolina. In his obituary, the Chicago Sun-Times called him the "most famous name in sports," and wrote that he had earned the nickname

easy Look at Net is free and simple ports scanner, packets sniffer and web-page source loader. Additional features: scans opened TCP ports, packets are filtered by incoming and outgoing, by IP addresses, ports and protocols - TCP, UDP, ICMP, IGMP. As a packet sniffer it creates log files with saved packet with information for each packet including : IP addresses, ports and protocol As a web-page source loader it can take output of HTTP web-servers (for example FTP) and load it to the browser. It uses proxies to get access to banned sites. Scans all computer on local network by IP addresses (thanks to IpFinder), sorted by IP addresses and ports. Scans systems on local network, filters by outgoing and incoming IP addresses. Scans all computer on internet with filtering by IP addresses and ports. Prints all scan results to results.txt Proxies list allows you to connect to different internet places via proxy Download file from internet with preinstalled proxy, proxies list. Starts scanning and saves results.txt Starts scanning without results.txt Uses file-system cache to avoid re-scans of the same file. Easy to use (instructions included) System Requirements: Windows XP/7/8 Easy Look at Net Features: Scans opened TCP ports, packets are filtered by incoming and outgoing, by IP addresses, ports and protocols - TCP, UDP, ICMP, IGMP. "easy Look at Net" is a free and simple ports scanner, packets sniffer and web-page source loader. Multithread ports scanner and packets sniffer specifically made to scan opened TCP ports, packets are filtered by incoming and outgoing, by IP addresses, ports and protocols - TCP, UDP, ICMP, IGMP. Simple web-page source downloader worked via proxy server, if is present in system. easy Look at Net Features: Intuitive and simple interface Multi-thread scanning User configurable time interval Downloads data in \*.txt format Monitor multiple network adapters Capture packets in \*.pcap or \*.cnt format View captured packets, clear saved packet data Detect TCP and UDP sockets connections by port number, host address, address type and protocol Human readable reports "easy Look at Net" requires Windows 2000 or higher with mforesight and Powershell 1.0 client. Other features are not support on Windows XP or lower. "easy Look at Net" works perfectly with Windows 2000 or higher. "easy Look at Net" dependencies with other software: Microsoft.NET framework 1.1 or higher, mforesight or Forensics Pro, and Powershell 2.0 or higher. You can install them in your computer. The latest version of "easy Look at Net" is 0.2, it is available at the following location: Microsoft announced an important change regarding Windows Activation. Windows Activation has been deprecated. All new Windows programs and programs that require activation or will activate after installation will be removed from the Windows activation list. The Windows activation process has been replaced with a new Windows Encryption process. I do not know what has changed since in the encryption process. I would imagine this to be slightly different from the old process. "easy Look at Net" is a free and simple ports scanner, packets sniffer and web-page source loader. Multithread ports scanner and packets sniffer specifically made to scan opened TCP ports, packets are filtered by incoming and outgoing, by IP addresses, ports and protocols - TCP, UDP, ICMP, IGMP. Simple web-page source downloader worked via proxy server, if is present in system. easy Look at Net Description: "easy Look at Net" is a free and simple ports scanner, packets sniffer and web-page source loader

#### What's New In Easy Look At Net?

easy Look at Net is a free and simple ports scanner, packets sniffer and web-page source downloader. Multithread ports scanner and packets sniffer specifically made to scan opened TCP ports, packets are filtered by incoming and outgoing, by IP addresses, ports and protocols - TCP, UDP, ICMP, IGMP. Simple web-page source downloader worked via proxy server, if is present in system. easy Look at Net uses a special algorithm to speed up port scanning. All configuration settings are stored in local file (Settings.ini) - easy Look at Net's behavior can be controlled by local variables. easy Look at Net supports: protocols (TCP, UDP, ICMP, IGMP) ports ( 1 to 65534) IP addresses (all ranges) Internet Protocol version 4 (IPv4) and Internet Protocol version 6 (IPv6) addresses authentication methods (plain, MAC, digital ssl/tls) easy Look at Net is a free and simple ports scanner, packets sniffer and web-page source downloader.
