In 1952, the first Fender Mustang Rosewood Telecaster model was introduced, named for Rosewood, Rosewood, Ontario, Canada. As it happened, the first reference to the effects being "produced by the Fender engineers was a segment in the 1977 magazine advert for the then new Mustang single-cutaway instrument. In it, Fender showed a prototype/early. L-100F - L-100F is a.32 amp with a master volume control.1. Field of the Invention The present invention relates to an image forming apparatus such as a copying machine, a printer, or a facsimile apparatus provided with a fixing unit for heating/fusing an image on a paper sheet or the like while conveying it. 2. Related Background Art Image forming apparatuses such as color copying machines have been recently demanded to have a compact and lightweight design. Along with this demand, a fixing unit used in such an image forming apparatus has also been required to be made compact and lightweight. Various types of image forming apparatuses having a fixing unit have been developed, but an apparatus with a roller heating type of heating/fixing unit has been widely used. FIG. 5 shows a conventional example of a fixing unit applied to such an image forming apparatus. FIG. 5 is a schematic cross-sectional view of a fixing unit, and shows it as viewed from above. The fixing unit 11 is provided with a heating roller 2 serving as a fixing member and a support member 4 in a heating member fixing part. The heating roller 2 is opposed to a pressure roller 5 and arranged to be rotated so as to be in contact with the pressure roller 5. A heater 24, a halogen lamp or the like is incorporated in the fixing unit 11. Due to the heat of the heater 24 or the halogen lamp, the heat of the heating roller 2 is transmitted to the pressure roller 5 via a nip formed between the heating roller 2 and the pressure roller 5 so as to make the heating roller 2 and the pressure roller 5 nip. Thereby, an unfixed toner image on a paper sheet is heated and fixed. When the fixing unit 11 is manufactured, a conforming coating is applied to the entire circumference surface of the heating roller 2. However, because such a conforming coating is not sufficient as a fixing member, a problem of poor high-temperature resistance of the conforming coating is experienced. Thus, there is a fear that the conforming coating
