"I'm proud of how the development team at EA Sports has applied our learnings from the FIFA 18 engine to create the most intelligent motion-based football experience yet," said Peter Moore, Executive Producer, Electronic Arts and Chief Creative Officer, EA Sports. "From the player's movement, ball control and on-ball actions, to the manner in which players are tackling, FUT players will now have to be smart in order to outwit the smartest competition."

Key Game Features: Intelligent Player Motion: Get to know your opponent Learn how they play Analyse their habits and tendencies and adapt to beat their preferred style Predict the actions they take on the ball For all the players, 3D motion capture of elite players is used to create the player models.
