good, clean workspace. Photoshop's workspace is an area on your computer screen where you place and manipulate the images you are going to use in your projects. If you have bad vision, then the workspace settings for your monitor can sometimes be set to such a large size that only parts of the screen display the correct image. Other times you may have to physically move your mouse to areas near the corner of your monitor to place your image in the proper location. However, the workspace is an area designed to make sure that the images you place

on the screen are displayed correctly.

The workspace is not just for learning Photoshop; it's for using Photoshop. In this section, you find out how to set up Photoshop so that it is most efficient for your workflow. Photoshop includes a menu for adjusting workspace settings, but if you aren't using the menu options yet, then you may want to turn off these settings until you start using them. ## Telling Photoshop Where to Look for Files Photoshop allows you

President Obama will nominate a justice to fill the Supreme Court seat

vacated by the late Antonin Scalia, clearing the way for his successor to strike a final deal on taxes, health care and other top issues. The designation, to be made public Wednesday, will bring to an end weeks of suspense surrounding an appointment that has alarmed conservatives, who warned that a liberal judge might strike down parts of landmark laws like the 2010 health care overhaul.

ADVERTISEMENT The president said he is “now in the final stretch” of choosing a successor, but made no mention of who might get the call.

The president's spokesman said he will nominate "a very talented and qualified judge, hopefully something that is not on anybody's short list." The White House will make clear that the president is leaving it up to the Senate to decide the fate of the conservative jurist. Democrats on Capitol Hill lauded the move, but Republicans said there is little to no reason to tip the scales for the next president. "It's important that the Senate have time to consider this selection and to ensure that this is someone who can provide our country with the great jurisprudence

that it so clearly needs,” said Senate Majority Leader Mitch McConnell Addison (Mitch) Mitchell McConnell Ocasio-Cortez to voters: Tell McConnell 'he is playing with fire' with Ginsburg's seat McConnell locks down key GOP votes in Supreme Court fight Video shows NYC subway station renamed after Ruth Bader Ginsburg MORE (R-Ky.). “It’s not clear that anybody is going to come to the fore that’s suitable to fill the vacancy.” The president’s pick will likely be someone who fits the mold of previous nominees, one of whom,

John Paul Stevens, was revered by both sides of the aisle. Stevens, who retired in 2010, was a traditional conservative, but he also was a respected moderate, particularly on racial matters. ADVERTISEMENT

While the nomination hasn't been made yet, it is thought that Obama is considering liberal federal appeals court Judge Sonia Sotomayor, 67, of New York. A number of Republican senators praised the potential nomination, though some warned it may not address the biggest political issue facing the high court. Reince Priebus, the chairman of the

Republican National Committee,
called the choice “politically
