- This is an easiest way to send files to someone . about.. git master. miopocket 40 release 68 zip download. miopocket 4 0 relax 68 mediafire - This is an easiest way to send files to someone . 4.Q: VBA event for a control does not fire I'm trying to create a form in Microsoft Access and I'm adding a control (an XPA, which I found in this link). But I'm facing the issue of why the event I'm using to fire it does not work. I've tried it in following ways: I double clicked on the XPA, clicked on the VBE then typed: Option Compare Database Option Explicit Private Sub Form_Current() End Sub Private Sub XPA_BeforeUpdate() MsgBox "Hello World" End Sub but I got: Run-time error "424":Object required If I double click on the XPA and then type the following line, which should be the equivalent of the above one but without the event, the event is fired: Private Sub XPA_Click() End Sub It's not the first time I'm trying to do this and I'm always facing a similar issue. Thanks in advance. A: The event Sub should be Private Sub XPA_BeforeUpdate() End Sub and Private Sub

XPA_Click() should be changed to Private Sub XPA_Click() (Without the Sub). or Remove the Private Sub XPA_Click() and the event should be Private Sub XPA_BeforeUpdate() End Sub I think you will find this easier when creating events. Teaching students to negotiate the use

MioPocket 40 Release 68zip

Nothing in terms of features has been altered, but it's a great way to get this IMSi package in a more stable way..
