## Turbowin Sodena 11 ((FREE))

194 Chapter 12: The Bathymetry When you select the button Transparent Dark Bathymetry View you can also: Displays the depth isolines as a transparent colour. Displays the depth isolines in a dark way (black on black) Displays the depth isolines and the depth map with a dark background (black on white). Now you can use the toolbar buttons to: Display the depth isolines as a transparent colour. Display the depth isolines in a dark way (black on black) Display the depth isolines and the depth map with a dark background (black on white). TurboWin Nouvelles Fonctionnalités V8-194 / 223 1 9 B\_INSERT\_TO\_SCREEN Load tutorial Load Click All Press any key, then click Back to Tutorial. menu. To view the tutorial, scroll to the bottom of the window. You will see two tabs (General and Display) with tutorials on TurboWin Sopara, as well as at the end of the program. Reminder : click All on a right panel to move to the next tutorial. TurboWin How to Navigate when using more than one Turbowin database (Tutorial for Sopara). 144 Chapter 8: Processing Of Marine Data : Field The Field Tools menu enables you to process your field data. This menu is displayed as the first elements when you start TurboWin Sopara. You can open the Field Tools menu by clicking the first menu with a right button click. The Field Tool menu lists the following functions : - Load tutorial : For beginners, we have in our library tutorials for the most commonly used command functions, as well as for more complex functions. These tutorials can be accessed by clicking All or right button Click Tutorial. - Configure other options using a right button click. You can click Configure, to open a dialog box where you can configure the display and fields of the field data. The Configure dialog box lists the following fields : tab Atlantik (the survey area definition) : tab Sonde the name of the database you want to process (here Sopara) tab What fields should the field data be displayed (here Depth, Latitude, Longitude, Title and Tracks) tab What database are you currently in (Click once on the database name in the database list on the left of the program. Click its name a second time on the right of the program to display the tables with the field data on the left of the screen). Click R\_June when you are working on the R\_June database. Confirm with Enter to save your changes. This function is very useful if you have multiple databases. You just have to select the database(ies) in which you would like to update the field data and click OK. You can also configure the Map legend using this function. This function works with the data fields that have been selected in the tables of the database. You can also display a map of the chart or a

---

map displaying the field data you want to display. Map legend Click once on the Map Legend tab to display the Map Legend box. Click and hold with the left button to highlight multiple options in the legend. Click on the right button to add the highlighted lines to the legend. Click with the right button on a legend line to remove it. Click on an option to add it to the Map Legend box. Click OK when you are done to display the changes on the screen. Click Once on the Map legend box to close it. The Map Legend box is hidden by default. To reveal it, click once with the left button on the top right corner of the screen. The legend will appear on the screen.
