It is highly possible that your favorite music players, like iTunes, are not able to read the files on your computer. Most of the time, such issue happens because of a problem with the audio driver. However, this is not the only reason for the lack of audio. There are many reasons for the issues of sound on your Mac. Get rid of no sound issues Gaurav kumar (Alan B.) shares how to fix no sound issue on MAC computer. #### What's New In?

NoSoundFixer is a small utility that is easy to use. It will quickly and easily find and fix your PC's sound card issues. It will scan your computer for sound related errors and fix them. It is safe to use and it works on all 32bit and 64bit Windows Operating Systems. HOW TO? NoSoundFixer is a small utility that is easy to use. It will quickly and easily find and fix your PC's sound card issues. It will scan your computer for sound related errors and fix them. It is safe to use and it works on all 32bit and 64bit Windows Operating Systems.

INSTALLATION: 1. Extract files from archive to any folder. 2. If you have installed an earlier version of the program, you can just run the newer version. Otherwise, to install it you must first remove the old version. 3. Double-click "install.bat" to start the installation. 4. A progress window will appear during the install process. It will show a label for the version you are installing and how much of the install process is done. 5. When it is finished the program will start and will be ready to be run. To remove the program, simply delete the folder you extracted the files to. 6. Restart your computer to make sure all the necessary changes take effect. CREDITS: This software was developed by Dane Strathearn who is the lead developer and creator of many other applications

that can be found on our website. Dane has been developing software since 2002 and has over 10 years of experience. His development experience has taken him to many different software environments, from developing for Microsoft Windows to developing for Mac and Linux and iOS. Please visit our website at [www.despirit.com](http://www.despirit.com) PS: You may have to install the DirectX Filter in order to use NoSoundFixer. The DirectX Filter is included and can be found in the "Other Tools" section of NoSoundFixer. Please follow the instructions in the instructions in the ReadMe.txt file that is in the "Other Tools" section.

Questions and Answers: Q: Where can I find the DirectX Filter? A: You will need to install the DirectX Filter in order to use the sound card scanner. This is free and can be found in the "Other Tools" section of NoSoundFixer. You may have to restart your computer after installing this tool. Q: When I use the NoSoundFixer, I get a message saying "No sound cards were found". Why is that? A: Make sure you are selecting the right speaker on your sound card and that you have the right speakers connected. Q: When I open the "Scanner" tab on NoSoundFixer, it is showing "Scanner" as greyed out. A: Scanner tab is

**System Requirements:**
