What's New In?

Streamingstar Video Capture is a powerful video recording software. It allows you to capture full screen or window/menu regions, and with the support of audio recording, also capture audio activity on your computer. So you are the kind of person who likes to record music for free, but doesn't mind spending money for good quality? Are you the kind of person who doesn't mind streaming music from iTunes? If the answer to these questions is yes, then this new version of the streaming music player may be just what you need. Streamingstar iTunes Plus is a free program that lets you stream music from your computer to a mobile device. No iTunes or Windows Media Player software is required. You can either stream the song on your PC, and your mobile device will recognize it as a local source, or play the song through your device's media player. Simply choose the song you want to stream, then click Play to start streaming. If you don't have any songs you'd like to stream, you can select songs from the library and create playlists. You can then choose to have the playlist saved as a favorite, or streamed to your mobile device. If you have any questions about the process of streaming your music, check out the help section on the Streamingstar iTunes Plus website.
